

BUSINESSOBJECTS ENTERPRISE XI R1/R2: DESIGNING AND DEPLOYING A SOLUTION – WINDOWS (REV B)

T-BOEXIR24503

Course Description

This two-day instructor-led gives you the skills and knowledge required to design and deploy a BusinessObjects™ Enterprise system. Through hands-on activities and instructor demonstration, you will analyze customer requirements, and design architecture and a system management plan to meet the customer's needs. Based on the design, you will deploy the solution in a classroom environment. You'll also learn how to migrate system content from one environment to another.

In addition, you'll benefit from more in-depth exposure to the mechanics of a BusinessObjects Enterprise system and a careful review of the factors that can impact system performance. The course is structured to help system architects/administrators fine tune their deployment and get the most out of their system.

Course Audience

The target audience for this course is system architects/administrators who are responsible for designing and deploying BusinessObjects Enterprise across their organization.

Prerequisite Education

To be successful, learners who attend this course should have attended the following offerings:

- BusinessObjects Enterprise XI R1/R2: Administering Users and Content with the CMC (Instructor-led or eLearning)
- BusinessObjects Enterprise XI R1/R2: Administering Servers (Instructor-led or eLearning)

Prerequisite Knowledge/Experience

While not required for this course, experience with these products or technologies will be helpful:

- BusinessObjects Enterprise troubleshooting techniques
- BusinessObjects Enterprise server management
- BusinessObjects Enterprise account management
- BusinessObjects Enterprise content management
- BusinessObjects Enterprise security concepts
- NT enterprise security concepts (global and local groups, and directory structure)
- Crystal Reports® and core report design concepts

Additional Education

Not applicable for this offering.

Level, Delivery, and Duration

This advanced instructor-led offering is a two-day course.

Applicable Certification

This course is a core course in the BusinessObjects Certified Professional: BusinessObjects Enterprise XI certification.
